DESCRIPTION

- Through the smooth-running KERN roller conveyor attachments, KERN YRO, you can convert your platform scale into a robust measuring system for rapid and flexible weight determination in conveyor applications
- Especially suitable for use in production and dispatch lines, where time means money. The goods or packages can either be weighed as they pass over the balance or, at fixed stations, heavy goods can easily be pushed onto the scale thanks to the roller conveyor and moved onto the connected roller conveyor
- Simply connect the roller conveyor attachment to a platform (e.g. KERN IFB, IFS, IFS, KFP, KXP, SXS) – done!
- Robust aluminium profile frame. The modular design means that you can easily disassemble it for cleaning or to replace individual components
- Smooth-running, hot-dip galvanised steel rollers with ball bearings
- Conductive track rollers
- Suitable for use in dry environments
- Roller distance approx. 30 mm
- Direction of movement is lengthways
- Scope of delivery: 1 roller conveyor attachment (without scale)
